Experience

Mobile Application Developer

GMC Teknoloji

Feb 2020 - Present (8 months +)

working on mobile applications with Flutter, React-Native, also using effectively Firebase's Cloud Firestore, storage, authentication tools. Completed projects are given below.

- PandaTube:

PandaTube is the platform that can be watched Youtube videos which selected and filtered by parents for their children. Parents can create playlists or select from Youtube. Plus, they are able to limit usage of their children watch time and set a mathematical operation in order to prevent unsupervised usage of the app. It is released on AppStore & Google Play Store.

- Raf & Raf Business:

Raf and Raf Business are worked together. Raf Business is the mobile app that groceries, markets, restaurants sell their products in a cheaper way in order to preserve wasting products and throwing away. Raf is the mobile app which gives an ability to buy products for anyone want to buy cheaper products in a limited time. Raf is also supported with location-based features which will makes easy to find nearest items. They are released on AppStore & Google Play Store.
